

STAINLESS STEEL 90 DEGREE ELBOW

SS 90° Elbows are widely used to change pipe direction at a right angle, ensuring smooth flow transitions. Available in long and short radius types. They are manufactured from SS 304, 316, 316L, and 321 grades. Size range: ½" to 48"; Schedule: SCH 10 to SCH XXS. These elbows conform to ASME B16.9, ASTM A403 standards and are suitable for industries like oil & gas, chemical, water treatment and pharmaceuticals due to their strength and corrosion resistance.
