

STAINLESS STEEL BARREL NIPPLE

Barrel Nipples are straight pipe sections with male threads on both ends. Available in SS 304, 316 and other grades. Sizes: 1/8" to 4", lengths up to 12", pressure rated to 3000 PSI. Threads conform to NPT/BSP; standards include ASTM A733 and A182. Widely used in plumbing, air compressors and low-pressure chemical piping for connecting equipment or pipe sections.
