

STAINLESS STEEL BUTTERFLY VALVES

Butterfly Valves regulate flow via a disc that rotates around its axis. Compact, lightweight and quick to operate. They're suitable for large-diameter lines. Available in wafer, lug, and flanged types constructed from SS 304, 316 and Duplex. Sizes range from 2" to 48" with pressure ratings of PN10-PN40 or ANSI Class 150. Designed per API 609 and ISO 5211. They are used in food processing, HVAC, chemical and pharmaceutical industries for reliable throttling and shutoff control.
