

STAINLESS STEEL FEMALE CONNECTOR

Female Connectors are designed with internal threads for connecting tubing or male-threaded parts. Manufactured from SS 304, 316, 904L, sizes: 1/8" to 2", pressure rated to 6000 PSI. Threads: NPT/BSP; compliant with ASTM A182 and DIN 2353 standards. Used in instrumentation, hydraulic equipment, and control panels for reliable, leak-free connections in demanding environments.
