

STAINLESS STEEL FULL COUPLING

Full Couplings connect two pipes or fittings in a straight run available in socket weld or threaded types. Constructed from SS 304, 316, 316L, sizes: 1/4" to 4"; pressure classes: 3000#, 6000# and 9000#. Compliant with ASTM A182, ANSI B16.11 standards. These couplings are widely used in high-pressure fluid systems, oil pipelines and gas lines for reliable joint integrity.
