

STAINLESS STEEL HEX BUSHING

Hex Bushings reduce pipe size by joining two different threaded diameters, with a hex body for wrenching. Constructed from SS 304 and 316, available in male x female NPT/BSP threads, sizes: 1/8" x 1/4" to 4" x 3". Pressure rating: up to 6000 PSI. Standards: ASME B16.11, ASTM A182. Used in instrumentation, plumbing and gas lines for corrosion-resistant, compact transitions between pipe sizes.
