

STAINLESS STEEL REDUCRE NIPPLE

Reducer Nipples connect pipes of differing diameters via male threaded ends, facilitating pressure or flow transitions. Fabricated in SS 304/316, available in size combinations from 1/4" x 1/8" to 4" x 2". Threads conform to NPT/BSP standards, pressure rating up to 6000 PSI. Used in hydraulic, instrumentation and compressed gas systems requiring compact, corrosion-resistant fittings.
