

STAINLESS STEEL SLIP-ON-FLANGE

Slip-On Flanges slide over the pipe and are fillet welded on both sides to provide strong, leak-proof connections. Cost-effective and easy to install, they are ideal for low-pressure applications. Fabricated from SS 304/304L/316/316L and meeting ASME B16.5 standards, they are available in sizes from ½" to 48" and pressure classes from 150# to 1500#. Commonly used in water pipelines, HVAC, and food-grade piping systems.
