

STAINLESS STEEL TEE

SS Tees are used to connect three pipelines, available in equal or reducing branches. Made from SS 304, 316, and 904L, sizes: ½" to 24"; schedules: SCH 10 to SCH XXS. Manufactured to ASME B16.9, ASTM A403. Commonly used in power plants, chemical processing and sanitary piping where durable and pressure-rated junctions are essential for fluid distribution.
