

## STEEL 45 DEGREE ELBOW(IBR & NON IBR)

Steel 45° Elbows are used for directional changes in piping systems. Available in IBR-certified and non-IBR grades, made from carbon steel or alloy steel. Sizes range from ½" to 24"; pressure classes: ANSI B16.9. IBR-compliant fittings are certified for high-pressure steam lines, while non-IBR elbows are used in general utility pipelines and industrial setups.
